

LOG ROTATOR

QUAD ROLLS

- OPTIMAL LOG ROTATION
- CONTROLLED LOG TRANSITION
- REAL TIME ROTATION CONTROL

CARBOTECH

819 362-6317 | carbotech.ca

APPLICATIONS

- Primary breakdown systems
- High speed small logs line
- Designed for any wood species

FEATURES

- Quad rolls assembly to maintain logs all time
- Log rotation and positioning by hydraulic cylinders
- Robust construction
- Vertical displacement on linear bearings
- Electric drives

CAPACITIES

- Diameters from 3" to 24" (75 mm to 600 mm)
- Lengths from 8' to 20' (2,4 m to 6 m)
- Speed up to 600 FPM (180 m/min)
